Actearly | a City Collaboratory approach to early promotion of good health and Wellbeing

Early life changes to improve a child's future

Intervening positively in early life can improve the health and opportunities of the next generation. **Prevention is key.**

What actions will have the biggest impacts?

The ActEarly Research Consortium was established in 2019. ActEarly aimed to better understand how upstream early life interventions can improve the health and opportunities for children living in poverty.

Since 2019 ActEarly investigated two areas. Both with high levels of child poverty.

- Bradford, Yorkshire
- Tower Hamlets, London
